

CARACAT

CARAVAN + CATAMARAN

Use all 100% advantages of the World

Use all 100%
advantages
of the World

*You are welcome to a
new era of civilisation on earth*

Story of the innovation

We started a new era by completely removing the limits of imagination. The journey has begun with the adventurous idea of my dear daughter, by using a unique system to evolve a catamaran to a caravan. With the help of Schneider Caravaning's more than half a century of experience, we deepened the idea of unprecedented comfort both on solid ground and on the open sea. This resulted in a safe, smart and economically sustainable vehicle. From now on, there are no more compromises, whether land, sea or lake. We have a home for you in all the places you want.

Sea, lake and land

Caracat is a unique solution for living life to its fullest:
being able to live on sea, lakes and land with inks one vehicle
- our caracat.

Opening the imagination that looked for over years. And
also three times more comfort on the water.

Calming your soul with design.

Secure

Caracat's rising mechanism keeps over the strong waves and gets full comfort. With Caracat for the first time, a small sized vehicle gets the abilities of big sea vehicles.

*Awesome
engineering and
a new life vision.*

Patented Technology and Design

Caracat is working by a system entegrated to the catamaran; gets the stabilty multiplied 3 more times by the mechanism getting wider and high on sea and lake. This system makes the unit more stable that gives more security and comfort at maximum level.

Caracat has 2 different patents as industrial and design.

Extendable pontoons

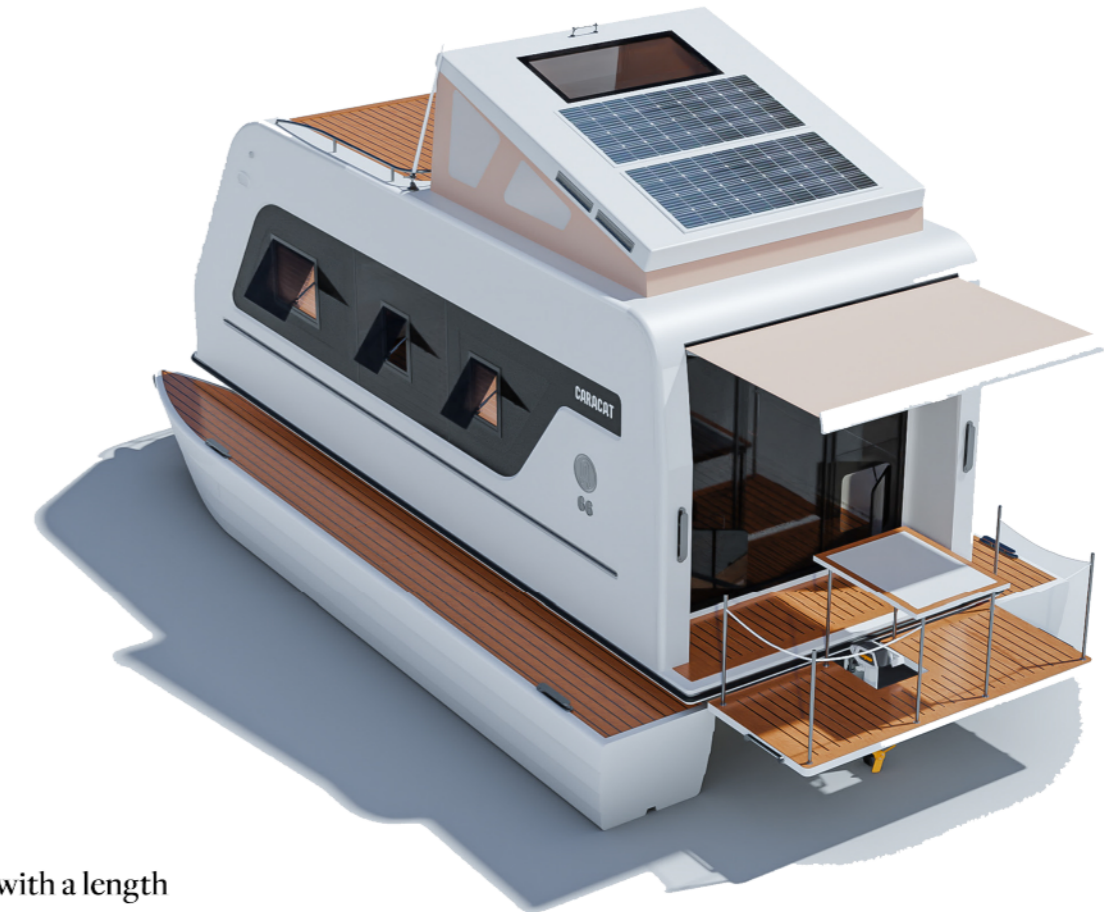

With the idea of combining life in the water and on land, we came up with our patented idea of an extendable pontoons.

When retracted, these allow unrestricted driving on all roads 2,50 m wide.

We have invented a unique and first-of-its-kind mechanism that extends the pontoons up to 1.20 meter to ensure maximum comfort and safety in the water. With it's 3.70m width, life in water is also guaranteed.

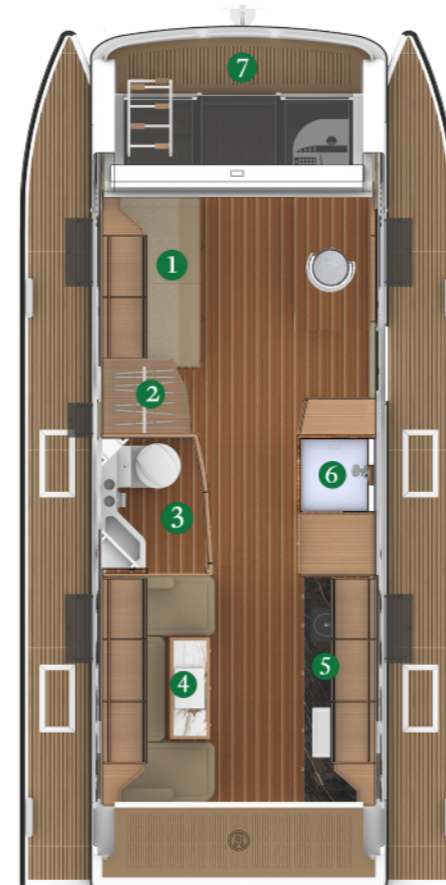

This is your new world design.

Caracat 66

Caracat 66 is one of Caravan Catamaran series with a length of 6.60 meters which is full functional luxury GRP hull and superstructure vehicle. It can be used both on land and at sea. Caracat is designed and equipped with superior technology and furnished with every imaginable luxury, this vehicle is a realization of a dream.

When you are on board you feel most comfortable as home but away from home. As a result, Caracat is offering you quality, power and comfort beyond her compare realize a desire.

*Designed for
fun times.*

A limitless life design

Getting bonded with nature

Licensed

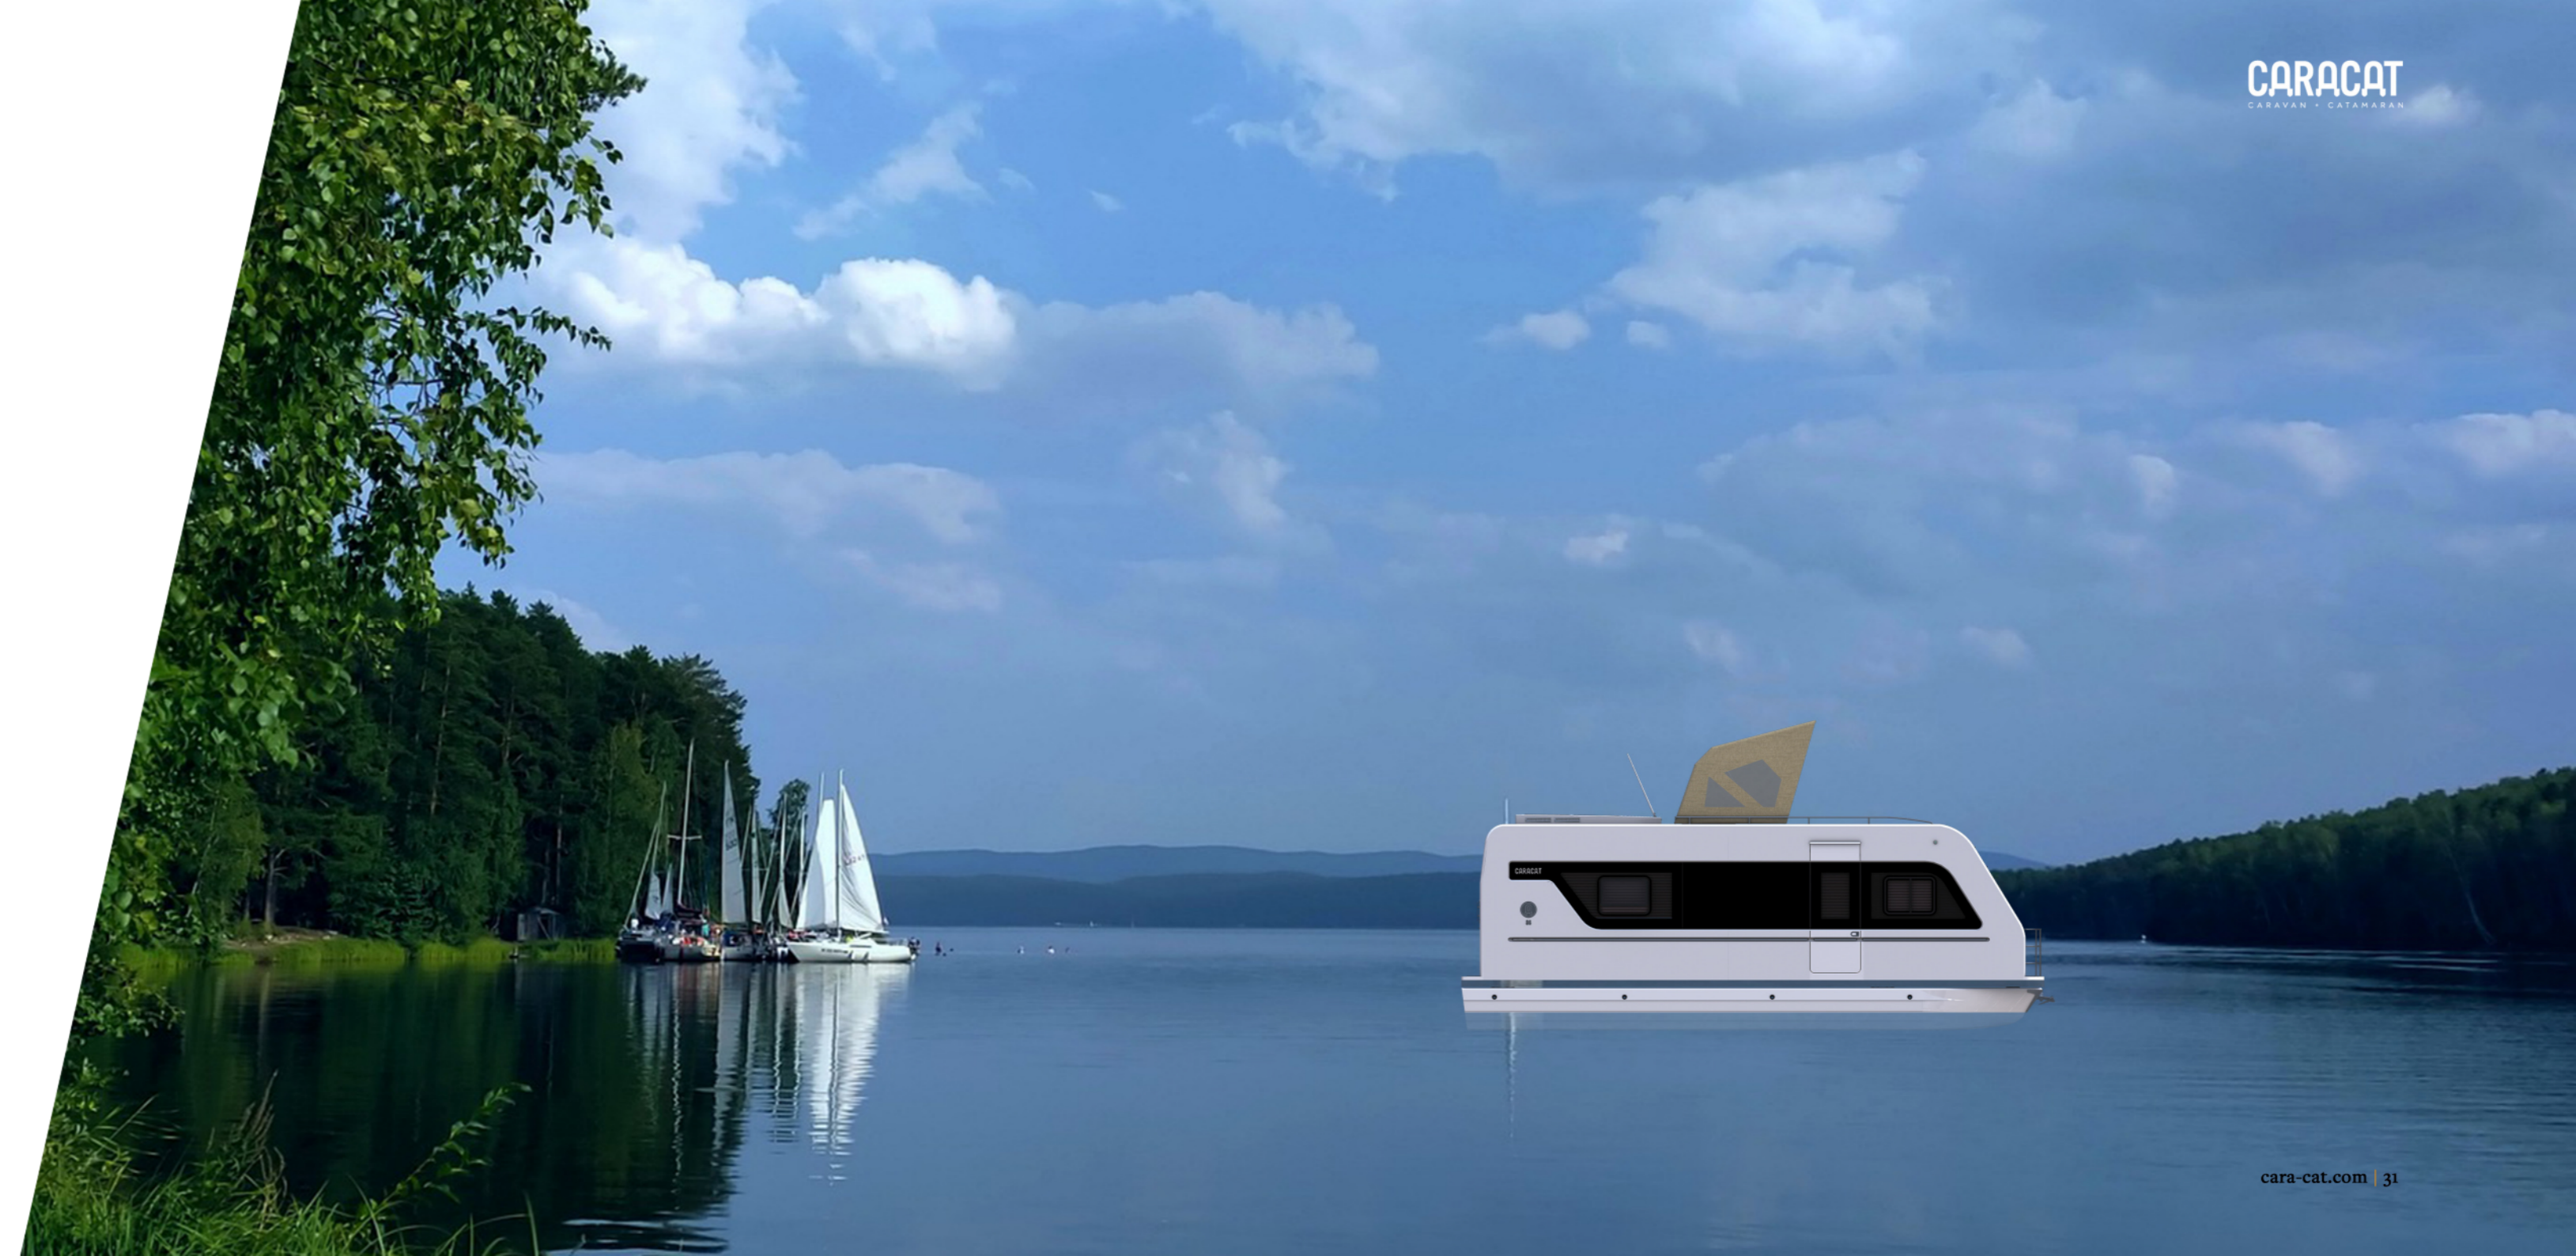

Owning or using a Caracat doesn't require any special License.

That's the only B Drivers License for exploring the world. With 15 hp thruster motor your caravan evolves to catamaran and the sea is open for you, whenever you want. Sea, lake or top of the lands one license and the world is beneath you.

Environmentalist

*Caracat is a new way of living with nature,
getting bonded with the environment.*

**Giving a vehicle putting the environment
at the top priority is the basis of it's nature.
A zero polluting awesome innovation.
All the toilet waste is burned in Caracat.
No matter where in the world, you know
that Cinderella lives happily ever after.**

Freedom

The world, of which 75% is waters, is now enterily yours.

Enjoy the new free world wherever your map starts without any special license.

Creative

The first vehicle you own or the first vehicle owning you.

Caracat, a patented invention is looking for free minded, limitless, borderless and independent explorers.

Economic

Yachting is a luxurious hobby, probably the dream of all free spirits.

Caracat is making the dreams come true and makes it be reachable. Caracat as getting easy to own a catamaran also gives the world changing advantages on the maintenance, also disposal marina costs. As you can easily get over the annual maintenance by yourself, there is no need of marine annuals and rental costs. Thought of parking a boat at the backyard of your garage looks insane but that's reality.

The dream for all free souls.

Comfortable

Caracat includes all comfort as your house, such as bedroom, balcony, bathroom and kitchen.

Now, that's the point of getting out of boundaries. Your lifestyle and needs will create your interior design with different options. As caracat giving the opportunity of noisless and comfortable traveling. It also gives high end technology and navigating tools.
